SUBJECT DATA SHEET AND REQUIREMENTS

last modified: 19th May 2016

METROLOGY

MÉRÉSTECHNIKA

1	Code	Semester nr. or fall/spring	Contact hours/week (lect.+semin.+lab.)	Requirements p / e / s	Credit	Language
	BMEGEGT8571	**spring**	**2+0+0**	**e**	**3**	**English**

2. Subject's responsible:

Name:	Title:	Affiliation (Department):
Dr. Tibor Szalay	Associate professor	Department of Manufacturing Science and Engineering

3. Lecturer:

Name:	Title:	Affiliation (Department):
Dr. Tibor Szalay	Associate professor	Department of Manufacturing Science and Engineering

4. Thematic background of the subject:

Industrial measurement, Quality assurance, Statistics

5. Compulsory / suggested prerequisites:

There is no special prerequisite for this subject.

6. Main aims and objectives, learning outcomes of the subject:

Theory and applications of both dimensional and process measurements. Processing of measured data, design of experiments and statistical analysis. Coordinate measuring machines and coordinate measurement theory. Laser interferometry and surface digitalisation. Measuring the micro-geometry. Multisensory systems, measurements of the most important process features (force, torque, temperature, vibration …). On-line monitoring techniques.

7. Method of education:

Lecture 2 h/w

8. Detailed thematic description of the subject:

Week	Lecture
1 - 2	Basic concept of geometrical product specifications (ISO and ANSI standards)
3 - 4	Software tools for product tolerance analysis and statistical dimension analysis.
5 - 7	Coordinate measurement techniques, equipment, directions of development, its limits.
8 -10	Surface topography measurement, confocal, focus variation and interferometry methods for high resolution optical measurements.
11 - 12	Measuring methods in cutting processes (force, torque, temperature, vibration real time measurement), data acquisition and processing, software tolls of it.
13 - 14	Application of process measurement, on-line monitoring, fault diagnostics, model creation …

9. Requirements and grading

a) in term-period

N.A.

b) in examination period

Oral exam.

c) Disciplinary Measures Against the Application of Unauthorized Means at Mid-Terms, Term-End Exams and Homework

The following students are subject to disciplinary measures.

1. Those students who apply unauthorized means (book, lecture notes, infocommunication means, tools for storing and forwarding electronic information, etc.), different from those listed in the course requirements or adopted by the lecturer in charge of the course assessment, in the written *mid-term exams* taken, or invite or accept any assistance of fellow students, with the exception of borrowing authorized means, will be disqualified from taking further mid-term exams in the very semester as a consequence of their action. Further to this, all of their results gained in the very semester will be void, can get no term-end signatures, and will have no access to Late Submission option. Final term-end results in courses with practical mark will automatically become Fail (1), the ones with exam requirements will be labelled Refused Admission to Exams.
2. Those students whose *homework* verifiably proves to be of foreign extraction, or alternatively, evident results or work of a third party, are referred to as their own, will be disqualified from taking further assessment sessions in the very semester as a consequence of their action. Further to this, all of their results gained in the very semester will be void, can get no term-end signatures, and will have no access to Late Submission options. Final term-end results in courses with practical mark will automatically become Fail (1), ones with exam requirements will be labelled Refused Admission to Exams.
3. Those students who apply unauthorized means (books, lecture notes, infocommunication means, tools for storing and forwarding electronic information, etc.), different from those listed in the course requirements or adopted by the lecturer in charge of the course assessment, in the written *term-end exams* taken, or invite or accept any assistance of fellow students, with the exception of borrowing authorized means, will immediately be disqualified from taking the term-end exam any further as a consequence of their action, and will be inhibited with an automatic Fail (1) in the exam. No further options to sit for the same exam can be accessed in the respective exam period.
4. Those students who alter, or make an attempt to alter the already corrected, evaluated, and distributed test or exercise/problem,
   i. as a consequence of their action, will be disqualified from further assessments in the respective semester. Further to this, all of their results gained in the very semester will be void, can get no term-end signatures, and will have no access to Late Submission options. Final term-end results in courses with practical mark will automatically become Fail (1), ones with exam requirements will be labelled Refused Admission to Exams;
   ii. and will immediately be inhibited with an automatic Fail (1) in the exam. No further options to sit for the same exam can be accessed in the very same exam period.

10. Retake and repeat

N.A.

11. Consulting opportunities:

1 hr/week upon appointment by e-mail

12. Reference literature (recommended):

- Robert J . Hocken and Paulo H . Pereira: Coordinate Measuring Machines and Systems, CRC Press 2011
- Geometrical product specifications – Course book for Technical Universities

13. Home study required to pass the subject:

Contact hours	28	h/semester
Home study for the courses	14	h/semester
Home study for the exam	48	h/semester
Total:	**90**	**h/semester**

14. The data sheet and the requirements are prepared by:

Name:	Title:	Affiliation (Department):
Dr. Tibor Szalay	Associate professor	Department of Manufacturing Science and Engineering
